PREFACE

The purpose of this study is to document the economic significance of the travel industry in California from 1992 through 2000 and to provide preliminary estimates for 2001. These findings show the level of travel spending by those traveling to and through the state, and the impact this spending has on the economy in terms of the earnings, employment and tax revenue.

This study was prepared for the California Travel and Tourism Commission and the Division of Tourism, California Technology, Trade and Commerce Agency. Special thanks are due to Eileen Hook, Research Manager of the California Division of Tourism, for her support and assistance.

1. INTRODUCTION

This report describes the economic impacts of travel to and through the state of California over the time period 1992 to 2000. Preliminary estimates for 2001 are provided at the state level only, and will be revised when more complete data become available. These estimates of the direct impacts associated with traveler spending in California were produced using the Regional Travel Impact Model (RTIM) developed by Dean Runyan Associates. The input data used to detail the economic impacts of the California travel industry were derived from various local, state and federal sources. A primary objective of this research is to provide reliable, detailed figures that allow comparisons from year-to-year at the state and county levels.

A description of the RTIM methodology is included in Appendix A.

REVISIONS TO IMPACT ESTIMATES

There are two data and methodological revisions in this year's report. The incorporation of new population and vacation home estimates from the 2000 census resulted in some minor adjustments to the travel spending estimates for prior years. Secondly, the travel-generated employment estimates in this report are based on a revised method for calculating average annual employment. While the state employment estimates are similar to those of last year's report, estimates for some counties have been adjusted. All estimates (1991 through 2001) reflect these revisions. Accordingly, these estimates supersede all previous estimates.

TYPES OF TRAVEL IMPACTS INCLUDED

Most of the travel that occurs in California is included in the scope of this analysis. All trips to California by U.S. residents and foreign visitors are included. The travel of California residents to other destinations within California is included, provided that it is neither commuting nor other routine travel. Travel to non-California destinations by California residents is not included as a component of destination spending. Outbound air travel impacts are included in the air transportation category.

The impacts associated with both overnight and day travel are included if the travelers remain at the destination overnight or the destination is over 50 miles, one-way, from the traveler's home. These definitions are used to screen and, if necessary, to interpret and adjust local data used for travel impact measurements. The most conservative interpretation is employed where data limitations cause deviations from the above definition.

The terms "traveler" and "visitor" are used interchangeably in this report. Both represent a person who is traveling in the state of California, away from his or her

home, on a trip as defined above. The purpose of such travel can be for business, pleasure, shopping, to attend meetings, or for personal, medical or educational purposes.

AIR TRANSPORTATION AND TRAVEL ARRANGEMENT

This analysis focuses on travel and tourism as a component of local and statewide economies, and therefore focuses on destination-specific impacts. However, some impacts associated with non-destination-specific spending and employment are included. These non-destination-specific industries are air transportation and travel arrangement (travel agents and tour operators). These industries are classified as non-destination-specific because they provide services for travel to, through and from specific destinations. It is important to note, however, that the impacts of these industries (e.g., employment) occur within specific geographic areas, primarily those with commercial airport facilities.

Thirty-three counties in California had scheduled passenger air transportation in 2000. The associated employment impacts are allocated in this report to the county in which the employment is based. The associated spending impacts are also allocated to that county as non-destination spending.[1] However, it is important to recognize that the benefits from air travel also extend to those counties that do not provide air transportation. This might include, for example, an overnight visitor in Mendocino County who traveled by air from Chicago to Oakland.

Because air transportation facilities provide travel services that benefit businesses throughout the state, it is appropriate to include air transportation as a component of the travel industry. But because of the regional character of air travel, it is sometimes useful to exclude this sector when analyzing local economic impacts. These considerations are, of course, most relevant with respect to those counties with the largest air transportation impacts.

DIRECT VERSUS INDIRECT IMPACTS OR "MULTIPLIERS"

Economic impact measurements reported herein represent only direct economic impacts. Direct economic impacts include only the spending by travelers and the employment generated by that spending. Indirect or "multiplier" effects, which refer to the additional spending of businesses and employees induced by travel spending, are not included.

IMPACT CATEGORIES

The specific categories of travel impacts included in this analysis are as follows:

[1] San Francisco and San Mateo counties are the only exception. The employment associated with air transportation employment in San Mateo County is allocated to San Mateo, whereas most of the air transporation travel spending is allocated to San Francisco.

Impact Category	Description
Expenditures	Purchases by travelers during their trip, including lodging taxes and other applicable local and state taxes, paid by the traveler at the point of sale
Total Earnings	The earnings (wage and salary disbursements, earned benefits and proprietor income) of employees of businesses that receive travel expenditures. Only the earnings attributable to travel expenditures are included; this typically is only a portion of all business receipts.
Employment	Employment associated with the above earnings; this includes both full- and part-time positions of wage and salary workers as well as proprietors.
Local Tax Receipts	Tax receipts collected by counties and municipalities, as levied on applicable travel-related purchases
State Tax Receipts	State taxes, such as sales and gasoline taxes, attributable to travel expenditures and business taxes as levied on travel industry firms and employees

VISITOR CATEGORIES

Travelers are classified according to the type of accommodation in which they stay. The types of visitors are as follows:

Type of Visitor	Description
Hotel/Motel/B&B Guest	Travelers staying in hotels, motels, resorts, bed & breakfast establishments, and other commercial accommodations, excluding campgrounds, where a transient lodging tax is collected
Private Camper	Travelers staying in a privately owned (i.e., commercial) campground
Public Camper	Travelers staying in a publicly managed campground such as those managed by California State Parks, the U.S. Forest Service or the National Park Service
Private Home Visitor	Travelers staying as guests with friends or relatives
Vacation Home Visitor	Travelers using their own vacation home or timeshare and those borrowing or renting a vacation home where transient lodging tax is not collected
Day Visitor	Both in-state and out-of-state residents whose trip does not include an overnight stay at a destination in California

The "travel industry" as described in this report refers to a collection of businesses that provide goods and services to the traveling public. These types of businesses are coded according to the U.S. Office of Management and Budget's Standard Industrial Classifications (SIC). The level of detail at which traveler expenditures are attributed to business categories, as well as the specific assignments to SIC codes, are shown in Appendix C.

PRELIMINARY ESTIMATES

Preliminary estimates for 2001 were prepared at the state level only. These estimates take advantage of the most current state-level data for California and provide the timeliest measure of travel spending and the associated impacts in the state. While based on a consistent methodology and comparable data sources, full-year data was not available from all sources. In these cases, projections of state-level travel activity were made based on partial-year data.

Estimates produced using the state estimation method can differ from final county level impacts. The estimates produced by each method should be generally close, but not identical. Differences exist due to the availability of detailed county level data. Dean Runyan Associates and the Division of Tourism reserve the right to revise these estimates in the future as additional information relating to travel and its economic impact in 2001 becomes available.

REPORTING OF DETAILED ESTIMATES

All dollar amounts for travel spending, earnings and tax receipts are rounded to the nearest $100,000. For example, an estimate of $3,674,352 before rounding would be rounded to $3,700,000. In the detailed county tables, this is presented as $3.7 million. All employment estimates are rounded to the nearest ten jobs. For example, an employment estimate of 137 jobs before rounding would be rounded to 140 jobs. All totals in the tables are the sum of the estimates before rounding. For example, the sum of 40 (rounded from 37) and 60 (rounded from 57) would be 90 (rounded from $37 + 57 = 94$).

Local taxes refer to all city and county taxes. These include local sales taxes and room taxes. Property taxes are not included. State taxes include the state sales tax, the state gasoline fuel tax, and income taxes on travel industry firms and employees.

INTERPRETATION OF IMPACT ESTIMATES

Users of this report should be aware of several issues regarding the interpretation of the impact estimates contained herein:

- When comparing the impact estimates associated with different locations or different time periods, it is more appropriate to focus on destination spending (which excludes air transportation) rather than total travel spending.

- The estimates in this report are expressed in current dollars. There is no adjustment for inflation with the exception of the graph on page 8.
- The employment and business service categories found in the impact tables do not perfectly correspond to the industry categories used in various state and federal government publications. The spending and employment categories used in this report refer to a particular type of service, as opposed to an industry classification. For example, the accommodations category in this report includes only that spending or employment attributable to paid accommodations. It does not include spending on eating and drinking in a hotel restaurant or recreational services provided at a resort. In addition, government employees are not distinguished from the employees of commercial enterprises, as is often the case in other data series published by government agencies.
- These estimates supersede all estimates previously published.

REPORT CONTENTS

Following the introductory chapter, Chapter 2 provides an analysis of travel impacts at the state level for 1992-2001. Chapter 3 contains detailed county-level tables for the years 1992 through 2000, as well as other county-level tables. A description of the RTIM methodology is included in Appendix A. Definitions of the travel terms used in this report can be found in Appendix B. Appendix C lists the relevant business classifications (i.e., SIC codes) used to represent travel industry businesses.

Transient occupancy tax receipts are not provided in this year's report as has been the case in the past because complete data is not yet available through the 2000 fiscal year for all jurisdictions within the state. For this reason, Dean Runyan Associates will be providing this information on its website (www.deanrunyan.com) as this data becomes available.

2. THE STATE

The multi-billion dollar travel industry in California is a vital part of the state and local economies. The industry is represented primarily by retail and service firms, including lodging establishments, restaurants, retail stores, gasoline service stations, and other types of businesses that sell their products and services to travelers. The money that visitors spend on various goods and services while in California produces business receipts at these firms, which in turn employ California residents and pay their wages and salaries. State and local government units benefit from travel as well. The state government collects taxes on the gross receipts of businesses operating in the state, as well as sales and use taxes levied on the sale of goods and services to travelers. Local governments also collect sales and use taxes generated from traveler purchases.

During 2001, preliminary estimates show that travelers to California contributed $75.4 billion to the state economy. This spending directly supported over one million jobs with total earnings of $25.0 billion and generated $4.8 billion in state and local tax receipts. Since 1992, travel spending has grown an average of 5.7 percent annually while earnings generated by this spending have increased at 5.1 percent per year. The rate of inflation during this same time period was 2.7 percent per year.

California Travel Trends, 1992-2001p

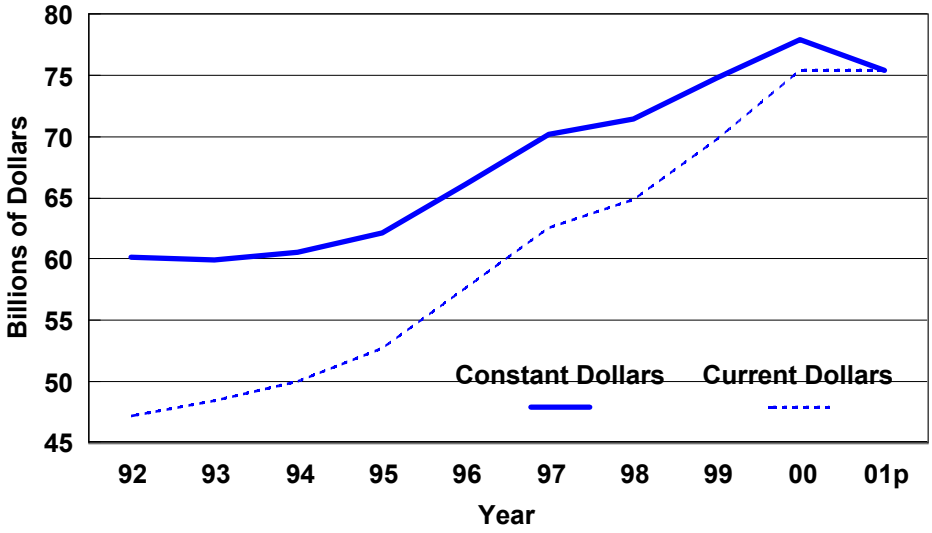
Year	Destination Spending ($Billion)	Total Travel Spending ($Billion)	Earnings ($Billion)	Employment (000 jobs)	Tax Receipts Local ($Billion)	State ($Billion)	Total ($Billion)
1992	40.1	47.1	16.0	878	0.9	2.0	2.9
1993	40.9	48.4	16.2	882	1.0	2.0	3.0
1994	42.2	50.0	16.8	914	1.0	2.0	3.1
1995	44.2	52.7	17.5	935	1.1	2.2	3.2
1996	48.6	57.6	19.0	990	1.2	2.4	3.6
1997	53.7	62.6	20.8	1,054	1.4	2.6	3.9
1998	56.5	64.9	21.9	1,045	1.4	2.7	4.1
1999	61.1	69.8	23.4	1,087	1.6	2.9	4.5
2000	66.0	75.4	24.9	1,100	1.7	3.1	4.8
2001p	66.1	75.4	25.0	1,051	1.7	3.1	4.8
*Annual Change							
00-01p	0.2%	0.0%	0.2%	-4.4%	-1.5%	-0.1%	-0.6%
92-01p	5.7%	5.4%	5.1%	2.0%	6.9%	5.1%	5.7%

*Estimates for 2001 are preliminary. Earnings include wage and salary disbursements, other earned benefits and proprietor income. Employment includes payroll employees and proprietors. Destination spending does not include travel arrangement and air fares.

The figure below shows the growth of total travel spending in California in current and constant (adjusted for inflation) dollars. From 1995 through 2000, travel spending in constant dollars exhibited strong growth. During 2001, a statewide decline in travel spending occurred due to the weak economy and the events of September 11.

California Travel Spending, 1992-2001p

Current and Constant Dollars



Note: Constant dollars were deflated with CPI-U (West Region).

Detailed travel spending impact estimates for 1992 through 2001p are shown in the following table. Preliminary estimates for 2001 were prepared at the state level in order to provide the most current and timely measurement of travel spending and the associated economic impacts in California. While using a consistent methodology and comparable data sources with respect to estimates for 2000 and prior years, the preliminary estimates are based on partial-year data. Full-year data are not available from all sources. The preliminary impact estimates are therefore subject to revision as future information relating to travel in California during 2001 becomes available.

California Travel Impacts, 1992-2001p

Tax Revenues Generated by Travel Spending ($Billion)										
Local Taxes	0.9	1.0	1.0	1.1	1.2	1.4	1.4	1.6	1.7	1.7
State Taxes	2.0	2.0	2.0	2.2	2.4	2.6	2.7	2.9	3.1	3.1
Total Taxes	2.9	3.0	3.1	3.2	3.6	3.9	4.1	4.5	4.8	4.8

Estimates for 2001 are preliminary (p). Destination Spending does not include air transportation or travel arrangement. Total Earnings includes wage and salary disbursements, other earned income and proprietor income. Employment includes payroll employees and proprietors. Details may not add to totals due to rounding.

3. THE COUNTIES

The following tables provide measurements of travel impacts for the years 1992 through 2000. The tables on pages 12-16 show summary measures for all California counties for the years 1992 through 2000. The detailed travel impact estimates for each of California's 58 counties for 1992 through 2000 begin on page 17.

In the detailed tables for each county, the first breakout, *Travel Spending by Type of Traveler Accommodation*, shows the travel spending by each type of traveler in the county. The second breakout, *Travel Spending by Type of Business Service*, indicates the amount of expenditures for different goods and services (e.g., accommodations, recreation) by all traveler types. Destination spending refers to all travel-related spending in the county except air transportation and travel arrangement.

Local taxes refer to sales and use taxes, and transient occupancy taxes collected by cities and counties. Property taxes and business license taxes are not included. State taxes include the state sales tax, the state gasoline fuel tax, corporate income taxes and personal income taxes.

All dollar amounts are rounded to the nearest $100,000. For example, an estimate of $3,674,352 before rounding would be rounded to $3,700,000. In the detailed county tables, this is presented as $3.7 million. All employment estimates are rounded to the nearest ten jobs. For example, an employment estimate of 137 jobs before rounding would be rounded to 140 jobs. All totals in the tables are the sum of the estimates before rounding. For example, the sum of 40 (rounded from 37) and 60 (rounded from 57) would be 90 (rounded from 37 + 57 = 94).

Total Travel Spending by County, 1992-2000

($Millions)

REGIONAL TRAVEL IMPACT MODEL (RTIM) METHODOLOGY
TRAVEL IMPACT ESTIMATION PROCEDURES

TRAVEL SPENDING

Hotel, Motel, B&B. Spending on commercial accommodations by hotel and motel guests is estimated from Transient Occupancy Tax (TOT) collections at the city/county jurisdictional level. Spending by hotel and motel guests in other business categories, such as food and transportation, is estimated using spending distributions reported in the visitor survey data. The spending distribution shows how travelers divide their spending between lodging and other purchases.

Private Campground. Spending by campers using commercial campgrounds is estimated from the number of commercial campsites, the average occupancy of these campsites (derived from state sources), and the average daily expenditures of visitor camp parties reported in survey data. Spending in other business categories is estimated in the same way as for hotel guests.

Public Campground. Spending by campers using public campgrounds is estimated from visitor counts at national and state parks, national forests, and state and federally managed recreation areas, and then multiplying the visitation by daily spending estimates from the visitor survey.

Private Home. Spending by private home guests is determined from visitor survey data estimating the number of visitors staying as guests of friends and relatives, and applying these rates to the household population base in individual counties.

Vacation Home. Estimated spending by vacation home renters and owners is based on a ratio derived between the number of visitors staying in commercial accommodations and those staying in vacation homes, and the relative expenditure levels for each type of visitor. The state total is then distributed among the counties using housing data from the U.S. Bureau of the Census.

Day Travel. The share of day visits as a percentage of total travel is estimated from visitor survey data and applied to average daily spending estimates to produce day visitor spending.

Note: All visitor survey data referenced in this study was provided by D.K. Shifflet & Associates, with the exception of data pertaining to camping. This information was obtained from a study of campers in California conducted by Dean Runyan Associates.

Air Transportation. A payroll-to-receipts ratio for the airline industry is estimated from Air Transport Association (ATA) and U.S. Department of Labor data. This ratio is applied to air transportation payroll data supplied by the California Employment Development Department to obtain air transportation revenue. Additional data from ATA is used to estimate U.S. passenger revenue as a share of total U.S. commercial airline operating revenue and applied to the California air transportation receipts to estimate air passenger receipts only; impacts of air cargo operations are excluded.

Travel Arrangement. This category consists of travel agents' commissions and fees paid to tour operators. A payroll-to-receipts ratio is estimated from the *Census of Transportation*. Receipts are estimated using this ratio and payroll data from the California Employment Department. Data supplied by the Reed Publishing Group from the *Louis Harris Travel Agency Survey* provided a breakout of travel agent receipts by type of sale (i.e., airline, hotel, rental car, cruise, other). However, these sales are included in other travel-related business categories, (e.g., airline ticket sales are included in air transportation), and are not broken out separately here.

RELATED TRAVEL IMPACTS

Spending by travelers generates jobs, payroll, and state and local tax revenue.

Total Earnings generated directly from traveler expenditures are estimated from the payroll-to-receipts ratio obtained from the 1997 Economic Census for the State of California, and earnings estimates from the Bureau of Economic Analysis.

Employment in each business category is calculated from wage data supplied by the California Employment Development Department, and earnings estimates from the Bureau of Economic Analysis.

Local Taxes consist of local room taxes, or transient occupancy taxes, and local sales and use taxes applicable to traveler purchases in eating and drinking establishments, in retail stores, and on automobile rentals.

State Taxes consist of state sales taxes applied to traveler spending on accommodations, retail shopping, restaurant meals, entertainment, the state fuel tax levied on motor fuel purchases, and personal and corporate income taxes.

DEFINITION OF TERMS

Accommodation: Spending for lodging by hotel and motel guests, campers and vacation home users.

Air Transportation: Air passenger spending attributable to travelers in and to California. The spending total includes air travel spending made outside California for travel to California, purchases by California residents who travel outside the state, and air travel within the state.

Campers: Travelers staying at RV parks and commercial campgrounds or at public campgrounds such as those in State or National Parks.

Day Visitor: A traveler whose trip does not include an overnight stay and who travels out of his/her local area (50+ miles one way).

Destination Spending: Spending by travelers at or near their destinations. This excludes spending on air transportation and for travel arrangement. All automobile operating expenses are included in the ground transportation component of destination spending.

Earnings: Total earnings include wage and salary disbursements, other earned benefits, and proprietor income. Only the earnings attributable to travel expenditures are included.

Eating, Drinking: Businesses serving food and beverages for immediate consumption. In addition to table service restaurants, this category includes fast-food outlets and refreshment stands.

Employment: Industry employment (jobs) associated with the travel-generated payroll and proprietors. This includes both full- and part-time positions.

Expenditures: Purchases by travelers during their trip, including lodging taxes and other applicable local and state taxes paid by the traveler at the point of sale.

Food Stores: Grocery stores, supermarkets, fruit stands, retail bakeries, and other businesses selling food for consumption off the premises.

Ground Transport: Spending on car rentals, gasoline and other vehicle operating expenses, and on local transportation such as taxi, bus and train.

Hotel and Motel Guests: Travelers staying in hotels, motels, resorts, bed & breakfast establishments, condominiums, and other lodging places where the transient occupancy tax is collected.

Local Tax Receipts: Tax revenue collected by counties and municipalities, as levied on applicable travel-related businesses (includes the transient lodging and local sales taxes).

Private Home Guests: Travelers staying as guests with friends or relatives.

Receipts: Travel expenditures less the sales and excise taxes imposed on those expenditures (also referred to as business receipts).

Recreation: Spending on amusement and recreation, such as admissions to tourist attractions.

Retail Sales: Spending for gifts, souvenirs and other items (excludes spending listed separately, such as food stores or recreation).

Spending Distributions: Information from visitor surveys showing how spending by each type of visitor is divided between various business categories.

State Tax Receipts: State sales taxes, business and occupation taxes, motor fuel taxes and car rental taxes attributable to travel expenditures.

Transient Occupancy Tax: A local tax charged on lodging (also referred to as room tax, transient lodging tax, hotel tax or bed tax).

Travel: A day or overnight trip that is not of a local or commuting nature. Travel may be for business or pleasure purposes.

Travel Arrangement: Spending for fees paid to travel agents and tour operators.

Traveler: A person traveling in California. A traveler may be a California resident or a resident of another state. The terms traveler and visitor have the same meaning in this report.

Vacation Home User: Travelers using their own vacation home or timeshare and those renting a vacation home or privately-owned cabin where transient lodging tax is not collected.
